

Precision engineering born in Germany and now satisfying customers all over the world.

The history and development of a special family business

Founded in 1958 by Albert Stulz Sr. in Morsbach, Germany, Montaplast is a mid-sized company representing five decades of experience in the production of plastic precision parts and systems - first for household appliances and now for the automobile industry. When Montaplast of North America, Inc. was founded in 1992 in Frankfort, Kentucky, the family business moved into a new and expansive phase. Since then, Montaplast sales offices and development centers have sprung up in Detroit, Suzhou, Nagoya, London, Paris, Stuttgart, Munich, and Cologne. In 2006 a third production location was added, the Montaplast Automotive System (SIP) Co., Ltd. in Suzhou near Shanghai.

History

- | | |
|------|---|
| 1958 | Company foundation by Albert Stulz Sr.
Manufacturing of plastic precision parts for household appliances
Start of the toolshop and extrusion technology |
| 1968 | Introduction of vibration welding of plastic parts |
| 1979 | Start of the lost core technology |
