

Apprentices

By People for People: Montaplast

To meet the growing demands of the market and our rising need for qualified junior

employees, we offer ongoing further education and a number of options for boosting and updating professional expertise. At the Morsbach location alone, 93 young people are being trained in technical and commercial professions, benefiting from the skills and dedication of almost 1000 engineers, salespeople, skilled technicians, and master craftsmen based there.

Each apprenticeship takes 3 to 3,5 years and after a succesful final exam you will have good chances to work at Montaplast and to continue your qualification. Our current apprenticeship programs are shown under [Job Openings](#).
